# MEMORANDUM

**From** : E. Chudakov  
**To** : P. Rossi  
**Subject** : Request to permit beam operations in Hall D in Fall 2016  
**Copies** : J. Gomez, E. Folts, E. Smith, B. Zihlmann, A. Deur

---

Dear Patrizia,

I am asking for permission for beam operations in Hall D accordingly to the accelerator schedule for Fall 2016 (Oct 8 - Dec 21).

The run plan and the list of run coordinators are outlined at

[https://halldweb.jlab.org/hdops/wiki/index.php/Fall\\_2016\\_GlueX\\_Run](https://halldweb.jlab.org/hdops/wiki/index.php/Fall_2016_GlueX_Run)

We have the required set of documents: COO, ESAD, RSAD and ERG, available at

[https://halldweb.jlab.org/hdops/wiki/index.php/Training\\_and\\_Safety](https://halldweb.jlab.org/hdops/wiki/index.php/Training_and_Safety)

There are no changes in the COO, and ERG documents since the previous run. The ESAD document includes a section on the prototype of the ComCAL detector. ComCAL is a part of the E12-10-011 (PrimeX) experiment. The planned running conditions are similar to those from the previous run, but includes 3 shift of higher intensity running.
