MEMORANDUM

From : E. Chudakov
To : P. Rossi
Subject : Request to permit beam operations in Hall D in 2017 (fall) - 2018 (spring)
Copies : J. Gomez, E. Folts, E. Smith, A. Manzlak, B. Zihlmann, A. Deur

Dear Patrizia,

I am asking for permission for beam operations in Hall D accordingly to the accelerator schedule for 2017 (fall) - 2018 (spring), in order to continue the data taking for the GlueX-I experiment E12-06-102.

The run plan and the list of run coordinators are outlined at

https://halldweb.jlab.org/hdops/wiki/index.php/Fall_2017_Spring_2018_GlueX_Run

We have the required set of documents: COO, ESAD, RSAD and ERG, available at

https://halldweb.jlab.org/hdops/wiki/index.php/Training_and_Safety

There are no changes in the COO document since the previous run. The ESAD document includes a section on the prototypes of TRD detectors (wire chamber and GEM) and the prototype of the muon chamber for experiment E12-13-008. The planned running conditions are similar to those from the previous run.
